

DEFENSE TO RESPONSE

Powered By

The Defense to Response Technology Program is intended to identify Department of Defense (DoD) developed technologies and transition these technologies to enhance public safety and homeland security.

How to Apply

We are searching for technologies with a Technology Readiness Level (TRL) of 6 or 7. These technologies must have been or are currently being supported by DoD funding. For the 2016-2017 D2R program we are searching for solutions in the following focus areas:

Responder Health and Safety | Situational Assessment and Detection | Enhanced Operability | Virtual Training | Other

Other- i.e. any other DoD supported technology that provides a solution to a first responder need.

Applicants must complete a registration page and upload a Technology Description and plan of action according to the downloadable template. Learn more and begin your application at:

www.TEEXPDC.com/d2r

Application Deadline August 31, 2016

D2R Awards

Up to twelve finalists will be selected to attend the Defense to Response Technology Showcase, September 20-22, 2016 in College Station, Texas. Three companies will receive

Up to
\$110,000

In Services

per company to implement their technology into the response market.
